GAGE Makkal

Every gauge in date.
Every certificate in its place.

GageMakkal keeps your measuring equipment and its calibrations in one place. It tells you what's due before it's late, reads the lab's certificates for you, and shows the auditor the whole history in a few clicks.

The equipment register, with the status of each piece

A calibration with its certificate

Your register, the way you work

Every piece with its asset ID, serial, barcode and location. Sort and filter like a spreadsheet; each piece shows Calibrated, Due soon, Overdue or Do not use.

Nothing comes due by surprise

Intervals per type or per piece, reminders before the date, and a schedule of what's coming.

Certificates read for you

Drop the lab's PDFs or a photo. AI reads the issuer, dates, result and readings, fills the record, and a person checks it.

Calibrate in-house, sign it, number it

Forms with readings and limits, as found and as left, approval with an electronic signature, and your own numbered certificates.

Traceable back to the accredited lab

Reference standards and the chain from any piece back to the lab; if a standard fails, the list of everything it calibrated.

- Everyone in the plant can use it
- AI reads your certificates
- Hosted in the EU

In an audit

- The full history of any piece: calibrations, certificates, and who changed what (audit log)
- The traceability chain, on one page
- Helps you meet ISO/IEC 17025 and ISO 9001 record requirements
- A validation pack per release, on request, for regulated plants

ALSO INCLUDED

- Several sites and roles, from Owner to Viewer
- Sign in with Microsoft or Google
- Search across everything
- Move in from spreadsheets or the old GageMakkal
- Android app on Google Play

Everyone can use it

Priced by what it looks after, not by person: one price for the plant.

Your data in the EU

Hosted in the EU. On your own server: soon.

Built by people who know calibration

Our team has built test and calibration software for manufacturers since 2010.

−20 % **Maintenance too?** MainteMakkal shares the same equipment, people and sites under one sign-in, and both apps together cost 20 % less.

Free	Essentials	Professional	Enterprise
€0	from €39 /mo	from €69 /mo	from €599 /mo
Up to 100 pieces. One person records, anyone views. AI reading of 25 certificates a year.	From 250 pieces. Any number of people. Outside labs calibrate: keep it all in one place.	In-house forms, as found / as left, approvals, your own certificates, traceability.	More than 5,000 pieces, several plants, priority support. Own servers: soon.

Per month, billed yearly, excluding VAT. Bands from 250 to 5,000 pieces. Billed yearly you get 2 months free; billed monthly costs a fifth more. Prices as on gage.makkal.app/pricing on 7 November 2026.

UP AND RUNNING IN A DAY

1. **Set up types and intervals**
   Say once how often each kind of instrument is calibrated.
2. **Bring your equipment in**
   Import your spreadsheet, or drop your lab certificates.
3. **Invite your team**
   Give each person a role and the sites they work at.

Start free at gage.makkal.app

A new organization starts with 30 days of everything, then stays free for one person.
